

Logiclave LABC Range of Autoclaves

A range of freestanding autoclaves available in standard cylindrical chamber sizes from 100 to 200 litres capacity and intended to suit a wide variety of modern laboratory applications. This range compliments our range of rectangular section autoclaves and utilises the same proven and easy to use Logiclave type control system.

- Mounted on swivel castors for easy transportation and positioning
- Designed to fit through standard width doorways
- Hygienic stainless steel fascia panels throughout entire range

Typical Applications:

- Porous / Fabrics
- Equipment & Utensils
- Empty Glassware
- Culture Media
- Plastic Discard
- Fluid Discard

Standard Features:

- Logiclave Controller with Touchscreen Interface
- Front Loading (Waist height)
- Power Operated Vertical Sliding Door
- Floating Door Seal
- 316L Stainless Steel Chambers
- Chamber Pressure Gauge
- Hygienic Stainless Steel Enclosure
- Emergency Stop / Door Safety Interlocks
