HISTORY

Smeg group was founded in 1948 and now has almost 2,000 employees in Guastalla, Italy, with a further 18 offices globally. Established worldwide as a leading manufacturer of domestic and professional equipment, Smeg today represents a symbol of Made in Italy excellence. This is

thanks to constant research and attention to quality, technology and design. For more than 30 years, Smeg Instruments has developed with the same values in the field of medical equipment. Knowledge built up over this time and professional collaborations across more than 30 countri-

es worldwide has allowed us to exceed industry expectations. Smeg Instruments offers the industry advanced technology in hospital sterilisation and disinfection with fully customisable solutions that are efficient, reliable and certifiable.

Smeg's production facility has been certified according to the EN ISO 14001 standards. The business is continually working to ensure that all products have the smallest possible environmental impact and energy efficient consumption. We are constantly researching and developing products that have lower water consumption and can maintain a perfect washing quality for longer. We continually strive for products that use less chemical agents, especially in glassware washers, and we take advantage of the high temperature inside the machine. These key areas of research and development are ongoing and evolving every day.

ECOLOGY

Smeg strives for maximum performance and high standards across all industries however this is especially important when dealing with products bound for the medical industry. Smeg

practitioners have an in-depth knowledge of what is required by such a demanding industry and therefore ensure that every product is perfectly suited to its task. Achieving

incredible results is no easy feat and requires continuous investment and research in the latest technology, inventiveness and creativity.

VISION

MISSION

Excellent raw materials and innovative design techniques have always been at the forefront of Smeg products. We offer an extremely complex and demanding industry a professional solution that guarantees exceptional performance, efficiency, flexibility and reliability.

OUR VALUES

SERVICE

Through its numerous highly specialised technical assistance centres that are spread all over the national territory and worldwide, Smeg takes care of its customers even during the all life phases of the product: start up and personnel training made by qualified technicians. About Italy, one national number guarantees a qualified support for each demand; about other countries, specialized technicians answer in different languages utilizing last phone and informatics technologies. Trust in Smeg means to have at your disposal an efficient after-sales service which can deliver spare-parts in 24 hours, for a quick solution to every question.

INNOVATION

The entire collection of Smeg Washer Disinfectors meets all the requirements indicated by the EN15883 standard. Our team of expert designers have developed products alongside those working directly within the sector to create high quality products which excel standards expected in the industry. Supported by the most advanced and modern equipment Smeg continues to collaborate and innovate in partnership with the industry.

QUALITY

Due to Smeg's in-depth experience in the field and first-hand experience dealing with medical technology and instruments, Smeg can guarantee impeccable washing and disinfection results. In fact, Smeg possesses ISO9001:2008 and ISO 13485:2012 quality certifications. Alongside this, all our thermal disinfection washers classified as class IIb medical devices are also certified according to the 93/42/CEE and conform to the EN15883 standard.

RELIABILITY

The utmost care is taken in choosing the most suitable and best quality raw materials. Smeg continuously makes use of advanced technology to turn these materials into outstanding products, known for their reliability and durability. The entire manufacturing process is overseen by a quality control system and subsequent statistical checks in the laboratory that simulate the use of the machines for ten years.

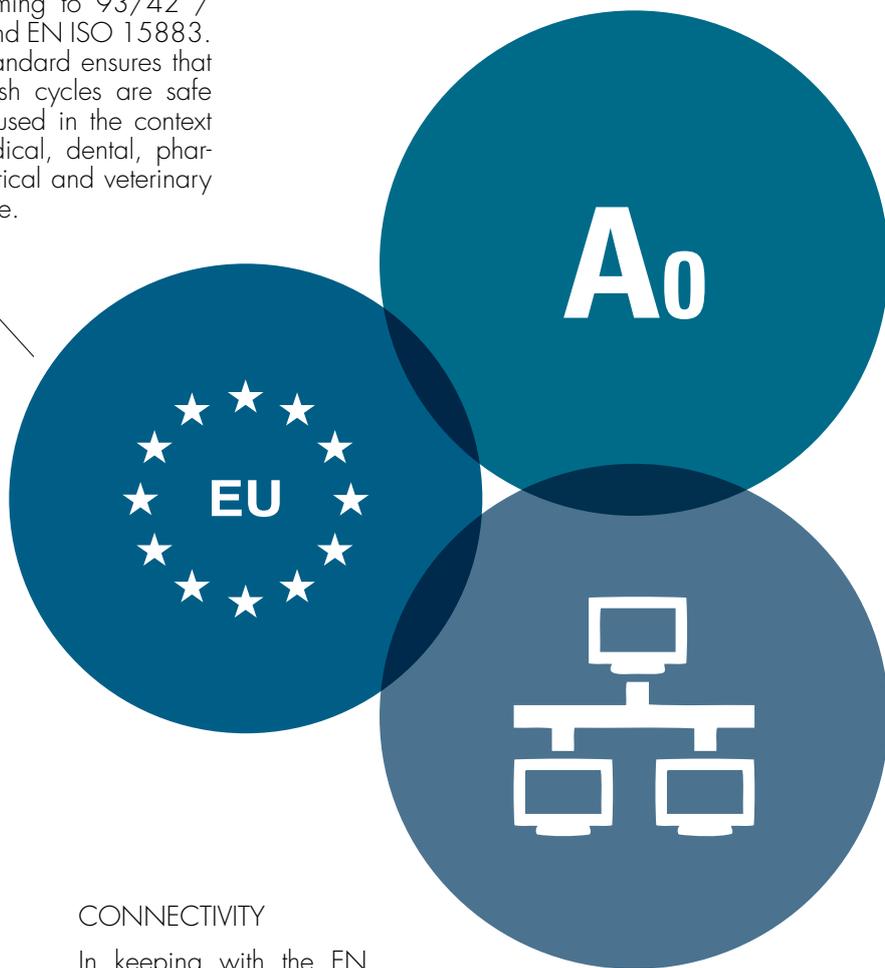

SAFETY OF RESULTS

EN ISO 15883

All Smeg washer disinfectors are medical devices conforming to 93/42 / EEC and EN ISO 15883. This standard ensures that all wash cycles are safe when used in the context of medical, dental, pharmaceutical and veterinary practice.

AO PARAMETER

AO is a numeric value introduced by EN ISO 15883. This standardised the effectiveness of the thermodisinfection process. In essence, the value of AO expresses the degree of "lethality" in seconds. Smeg washer disinfectors offer a wide choice of programs with different thermodisinfection solutions, able to calculate parameter AO in real time directly on a display. If a printer is present, it prints this parameter at the end of the program.

CONNECTIVITY

In keeping with the EN ISO 15883 standard, it is important that new-generation equipment has capability to communicate relevant performance data. The Smeg WD range is equipped with external access points so that any information regarding washing programs and thermodisinfection performance can be monitored.

KEY POINTS

EASY TO USE

Each function of the Smeg washer disinfector is controlled by user-friendly and highly intuitive display.

FLEXIBILITY

Smeg machines are designed to meet different washing requirements. These include surgical instruments, containers, mininvasive instruments, endoscopy, optics, anaesthesia sets and OP shoes. This is thanks to a wide range of inserts and accessories studied by the R & D department, along with specific wash programs which operate according to the material to be treated.

SILENT OPERATION

Innovations in Smeg washer disinfectors mean they operate almost silently during each process. This ensures healthy working environments.

THE RANGE

The WD Series is the result of more than thirty years of experience in the field of washing and thermodisinfection. It combines state-of-the-art technology and design that is totally reliable and guarantees the highest level of performance in compliance with the sector standards, such as EN15883.

The wash-chamber and the closing door are made exclusively of AISI 316L stainless steel with nickel chromium molybdenum, while the external panels are made of AISI 304 stainless steel. The components are made of a plastic material which is heat-resistant and can withstand corrosive substances or organic solvents.

Thanks to a four microprocessor system, it is possible to monitor and record any activity performed by the equipment. Advanced electronics allows users to benefit from a wide choice of programs and store up to 250 executed cycles in a memory buffer. The equipment can display all basic parameters and perform a complete diagnostic thanks to the specially designed management software WVD-TRACE or TRACELOG, unique to the Smeg professional range of washer disinfectors. All the instruments can be equipped with a printer which prints details of every cycle undertaken including the parameter A0 and any notable alarms.

BASIC

WASHING CHAMBER WITH 8 DIN BASKETS

EASY TOUCH DISPLAY

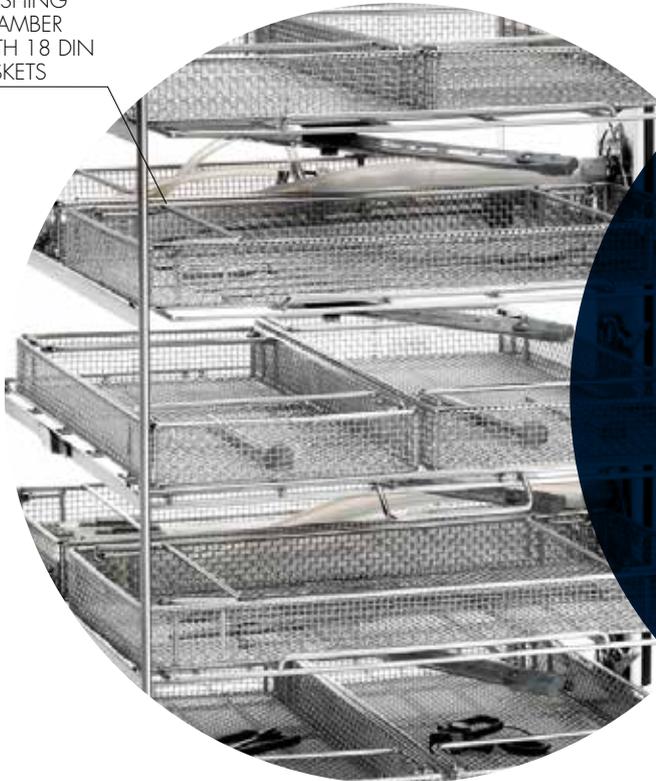

The 60cm and 90cm models offer a washing area of 1m² on four levels, equipped with spray arms for each washing level. In large models it is possible to reach a wash area of up to 2m². The equipment performs with high precision in detergent dosing and flowmeter control minimizes waste, significantly reducing environmental impact. With intelligent "management" of electric water heating, Smeg has also achieved a significant reduction in electrical consumption. This is thanks to the in-depth study of washing programs and use of an innovative and efficient forced air drying system (Steam condenser ECOSLIM).

The equipment also benefits from a LAN connection. This allows the upload of control software updates (firmware upload) without having to dismantle components by authorized technical personnel. It also enables users to remotely control in real-time the running state of the thermo-disinfection cycle, alarms and to set up and or modify new washing cycles from a PC. Users have the ability to download and store data regarding the cycles and can in turn verify in real time the parameter A0 obtained.

PROFESSIONAL

WASHING CHAMBER WITH 18 DIN BASKETS

FULL TOUCH DISPLAY

BASIC LINE

WD2145 - WD1160 - WD4060 - WD4190

WASHING DISINFECTOR WD2145

WD2145 is a washer disinfector with slim dimensions, designed with two washing levels. The washing chamber measures 380 x 480 x 580mm (105 litres) and has the capability for washing and thermic disinfection (up to 95°C).

D-ZCS1

WASHING SOLUTION FOR OP SHOES (D-ZCS1 TROLLEY FOR A MAXIMUM OF 3 PAIRS OF OP SHOES)

D-ZCS2

WASHING SOLUTION FOR OP SHOES (D-ZCS2 TROLLEY FOR A MAXIMUM OF 4 PAIRS OF OP SHOES)

CSK1/3

WASHING SOLUTION FOR SURGICAL INSTRUMENTS (CSK1/3 BASKET TO INSERT IN THE BASIC TROLLEYS D-CS1 AND D-CS2 WITH OTHER BASKETS AS FOR EXAMPLE D-CM1 AND D-SV)

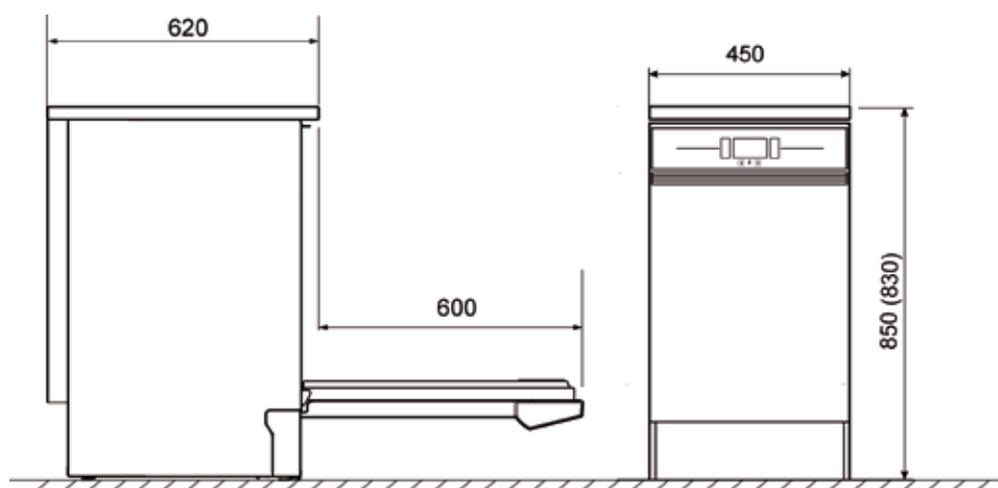

CB18

WASHING SOLUTION FOR SURGICAL INSTRUMENTS (CB18 BASKET TO INSERT IN THE BASIC TROLLEYS D-CS1 AND D-CS2)

INSTRUMENT BASKETS

Basic lower basket with sprayer
for the WD2145 series.
Suitable for surgical instrument
treatment.

CS1-1

UPPER LEVEL SURGICAL
INSTRUMENT BASKETS

Basic upper basket with
sprayer. Suitable for surgical
instrument treatment.

CS2

LOWER LEVEL SURGICAL
INSTRUMENT TROLLEY

Basic lower basket with sprayer. Suitable for
surgical instrument treatment.

COMPATIBLE
 WD1160
 WD4060
 WD4190
 WD3060
 WD5090T

CSK4B

2-LEVEL SURGICAL
 INSTRUMENT LOAD CARRIER

Suitable for treating standard and large-sized surgical instruments. Two washing levels served by an incorporated sprayer and sprayer on the bottom of the machine. Minimum working height 165 mm. To be fitted with 4 CSK DIN baskets.

CSK4BMIC

2-LEVEL SURGICAL
 INSTRUMENT LOAD CARRIER

Suitable for treating standard and large-sized surgical instruments and, at the same time, minimally invasive surgery accessories. Two washing levels with an incorporated sprayer on the upper level and the lower level uses the sprayer situated at the bottom of the wash chamber. Connection at the KITMIC10 basket available on the upper level. Minimum working height 165 mm. To be used with 3 CSK DIN baskets and 1 KITMIC10 basket (instead of 4 DIN baskets).

CSK8B

4-LEVEL SURGICAL
 INSTRUMENT LOAD CARRIER

Suitable for treating standard and large-sized surgical instruments. Four washing levels served by three incorporated sprayers and a sprayer on the bottom of the machine. Minimum working height 64 mm. To be fitted with 8 CSK DIN baskets.

CSK6B

3-LEVEL SURGICAL INSTRUMENT
 LOAD CARRIER

Suitable for treating standard and large-sized surgical instruments. Three washing levels served by two incorporated sprayers and a sprayer on the bottom of the machine. Minimum working height 75 mm. To be fitted with 6 CSK DIN baskets.

COMPATIBLE
WITH ALL
WASHER
DISINFECTORS

CSK1

1-LEVEL SURGICAL
INSTRUMENT INSERTS

Suitable for large-sized surgical instruments (ex. abdominal retractors, self-retaining retractors, lateral valves, etc.).

Dimensions: L x D x H 450 x 450 x 55mm, mesh 5 x 5mm
Space needed: entire washer level

CSK2

HALF-LEVEL SURGICAL
INSTRUMENT INSERTS

Suitable for medium-sized surgical instruments (ex. clamps, haemostatic forceps, scissors, suture instruments, etc.).

Dimensions: L x D x H 450 x 225 x 50mm, mesh 5 x 5mm
Space needed: half of a washer level

CSKDIN

HALF-LEVEL SURGICAL
INSTRUMENT INSERTS

Suitable for medium-sized surgical instruments (ex. clamps, haemostatic forceps, scissors, suture instruments, etc.).

Dimensions: L x D x H 480 x 245 x 50mm, mesh 5 x 5mm
Space needed: half of a washer level

COMPATIBLE
WITH ALL
WASHER
DISINFECTORS

KITMIC10

CANNULATED
INSTRUMENT INSERTS

Suitable for medium-sized minimally invasive surgery instruments.
Equipped with n° 4 luer locks and 5 connectors for hollow instruments.
Suitable for CSK4BMIC only.

Dimensions: L x D x H 480 x 245 x 50mm, mesh 5 x 5mm
Space needed: half of a washer level

CSK1/3

1/3-LEVEL SURGICAL
INSTRUMENT INSERTS

Suitable for medium-sized surgical instruments
(ex. clamps, haemostatic forceps, scissors, suture instruments, etc.).

Dimensions: L x D x H 435 x 160 x 50mm, mesh 5 x 5mm
Space needed: one third of a washer level

CSK1/6

1/6-LEVEL SURGICAL
INSTRUMENT INSERTS

Suitable for various small-sized surgical instruments (ex. scalpels, surgical scissors, small forceps, etc.).

Dimensions: L x D x H 130 x 225 x 50mm
Mesh: cover 5 x 5mm, basket 3 x 3 mm
Space needed: one sixth of a washer level

COMPATIBLE
WITH ALL
WASHER
DISINFECTORS

D-SV

VERTICAL
INSERT

Suitable for holding various surgical instruments in the vertical position (ex. Forceps, probes, swab holders, spatulas, osteotomies, chisels, etc.). Divided into multiple compartments and a central inclined tub for washing water drainage.

Dimensions: L x D x H 300 x 160 x 150 mm, basket mesh 3 x 3 mm

D-CM1

SURGICAL INSTRUMENT INSERT

Suitable for holding various surgical instruments

Mesh Insert: 3x3 mm

Made of stainless steel.

Dimensions: lxdxh 300x155x115 mm.

CSMICRO1

TINY SURGICAL INSTRUMENT INSERT

Surgical instrument basket with handles and lid.

Dimensions: L x D x H 240 x 235 x 55 mm, mesh insert 3 x 3 mm

Space needed: ¼ of a washer level

Suitable for various tiny instruments or very small instruments in general.

CSMICRO2

TINY SURGICAL INSTRUMENT
INSERT

Surgical instrument basket with handles and lid.

Dimensions: L x D x H 100 x 80 x 45 mm, mesh insert in micro-stretched netting.

Suitable for very small instruments in general.

COMPATIBLE
WITH ALL
WASHER
DISINFECTORS

CSMICRO3

TINY SURGICAL
INSTRUMENT INSERT

Dimensions: L x D x H 280x168x45 mm,
basket mesh in micro-stretched netting.

BFS

SUPPORT
SPECULUM

Support for vertical positioning of
speculum. Made in stainless steel.

Space needed: ¼ washer level
Suitable housing 6 speculum both single
and dual

SA3

KIDNEY BOWL SUPPORT

Basin and kidney bowl support.

Holds 4 kidney bowls

Space needed: half washer level of a CS3 load carrier

SCVO

ASPIRATION TUBE SUPPORT AND COLD LIGHT
CABLES

Suitable for the positioning of suction hoses and
cold light cables.

Capacity: up to 2 cables / tubes

Space needed: 1/4 of a washing basket CS2

COMPATIBLE
WD1160
WD4060
WD4190
WD3060
WD5090T

EF5

RIGID VIDEOLAPAROSCOPE AND
ENDOSCOPE LOAD CARRIER

Trolley for washing an endoscope container with cover
size max .:
Cover LxPxH = 510x410x30 mm
Container LxPxH = 515x430x120 mm.
To be used with IRCP sky sprayer

EF5DS

RIGID VIDEOLAPAROSCOPE AND ENDOSCOPE LOAD CARRIER EQUIPPED WITH
DRYING SYSTEM CONNECTION

Equipped with:

- 20 injectors, to wash hollow instruments, equipped with:
- 6 silicone connectors with a 1mm diameter hole.
- 6 silicone connectors with a 6mm diameter hole
- 4 silicone connectors with a 10mm diameter hole.
- 4 connections ULBEF2
- n°20 luer-lock connectors to connect the instruments
- n° 1 open CSK2 basket

EF3

SPECIAL OPHTHAMOLOGY LOAD CARRIER

Smeg has created, for washing and disinfecting the tiny fragile instruments used in the ophthalmology departments, a trolley with specific injection systems, quick connectors for all hollow instrument and cannula connection and a set of basins with special locks to prevent the force of the water jets from scattering the treated medical devices. Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system.

EF3DS

SPECIAL OPHTHAMOLOGY LOAD CARRIER WITH DRYING SYSTEM CONNECTION

Equipped with:

- 12 male connectors with diameters of 6, 4, 3 mm used for hollow instrument and tube injection washing.
- 9 female connectors with diameters of 7 and 4 mm
- 2 spring check valves with respective clamps for external washing of delicate tubular instruments
- 5 hollow supports with diameters of 7 and 4 mm for internal and external washing of cannulas
- 2 CSK2 baskets
- 4 CSK1/6 baskets provided with S-MIC locks for tiny delicate instruments

CPCENDO

ENDOSCOPE CONTAINER
WASHING LOAD CARRIER

Load carrier for washing an endoscope container with cover size max .:
Cover LxPxH = 510x410x30 mm
Container LxPxH = 515x430x120 mm.
To be used with IRCP sky sprayer

COMPATIBLE

- WD1160
- WD4060
- WD4190
- WD3060
- WD5090T

AE2BDS

ANESTHESIA LOAD CARRIER

Trolley for treating anesthesia instruments. It is equipped with an injection system for cleaning the inside of corrugated tubes with 10 nozzles (3 mm diameter) and 3 injectors (6 mm diameter). Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system.

Equipped with:

- 8 injection supports for corrugated tubes with a max. length of 150mm
- 13 nozzles for catheters
- 3 balloon nozzles
- 4 supports for masks and accessories

CM3

MASK WASHING LOAD CARRIER

Two-level trolley for washing and treating various types of masks. It holds up to 24 masks. Specifically, 8 masks can be placed on the top level and 16 on the bottom level. Uniform mask spraying is guaranteed by the sprayer on the bottom of the wash chamber and by the second sprayer arm placed between the 2 washing levels. Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system.

CPC 1

CONTAINER LOAD CARRIER

Load carrier for washing 2 containers and 2 lids with max. dimensions of 300 x 300 x 150mm (LxDxH). Complete container cleaning is guaranteed by a sprayer arm on the bottom of the wash chamber and by the second one placed on the trolley. Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system.

ZCS3

OPERATING ROOM SHOE TROLLEY

Load carrier with two washing levels for treating OP shoes. It can hold 12 pairs of shoes. Specifically, 4 pairs of shoes can be placed on the top level and 8 pairs on the bottom level. The specially configured shoe support hooks has been designed to prevent possible rubber deformation due to the high temperatures reached in the wash chamber. Uniform shoe spraying is guaranteed by a sprayer on the bottom of the wash chamber and by the second sprayer arm placed between the two washing levels. Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system.
Made in stainless steel.

ZCS1

UPPER SURGICAL SHOE BASKET

Upper shoe basket with sprayer.
It holds 4 pairs of shoes.

D-ZCS1

UPPER SURGICAL SHOE BASKET

Upper shoe basket with sprayer for
WD2145 series.
It holds 3 pairs of shoes.

ZCS2

LOWER SURGICAL SHOE BASKET

Lower shoe trolley. It holds 8 pairs of shoes.

D-ZCS2

LOWER SURGICAL SHOE BASKET

Lower shoe basket for the WD2145 series. It holds 4 pairs of shoes.

CS3

UNIVERSAL SUPPORT LOAD CARRIER

Two-level universal support load trolley with an incorporated sprayer and a sprayer on the bottom of the machine. Direct connection to the hydraulic unit is made through a quick-coupling self-adjusting system. It is suitable for positioning baby bottle baskets or for supports and various baskets. Made in stainless steel.

BABY BOTTLE CONTAINER

Container for 18 baby bottles with lids.
Positioning on a standard CS3 load carrier.
Space needed: half a rack for each level.
Made in stainless steel.

CB18

for 250 ml baby bottles
Dimensions l x p x h 210 x 425 x 195 mm

CB18/120

for 120 ml baby bottles
Dimensions l x p x h 210 x 425 x 125 mm

CB18/100

for 100 ml baby bottles
Dimensions l x p x h 210 x 425 x 115 mm

CPS20

CONTAINER FOR 20 PACIFIERS

Metal-netted container with lid. Positioned on a standard CS3 load carrier. Two baskets can be overlapped to increase the surgical instrument load capacity. Made in stainless steel.

Space needed: half a rack for each level. Dimensions: 430 x 190 x 60 mm (L x D x H). Mesh 5 x 5 mm.

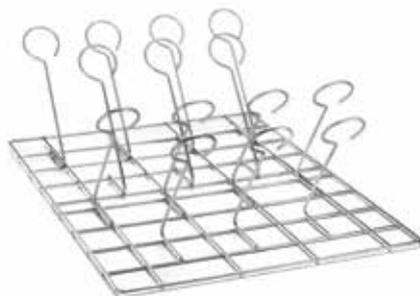

COMPATIBLE
WD7000

CSK12

MULTIFUNCTION WASHING LOAD CARRIER UP TO 4 LEVELS

Multifunction washing trolley which allows to combine general instruments washing and direct injection system for MIC instruments (2 levels available for MIC direct injection system with baskets CSKFLEX)

From 2 to 4 washing levels with 4 direct injection dismantable rotary arms on each level. Maximum height between levels 70 mm. Load capacity: max. 12 type DIN inserts. Made in stainless steel AISI 304.

SCLOG7

OPERATION THEATER SHOES WASHING INSERT

Load capacity: max. 14 shoes.
To be positioned onto CSK12 (max. 2).
Made in stainless steel AISI 304.

CSKFLEX

MIC WASHING INSERTS FOR HOLLOW INSTRUMENTS

Include 2 DIN inserts with direct injection system. Made in stainless steel AISI 304. Capacity: 10 hollow instruments inserts 400 mm length.

Luerlock connectors to be configured according to users' necessity.

CSK15

MULTIFUNCTION WASHING LOAD CARRIER UP TO 5 LEVELS

Multifunction washing trolley which allows to combine general instruments washing and direct injection system for MIC instruments (2 levels available for MIC direct injection system with baskets CSKFLEX)

From 2 to 5 washing levels with 4 direct injection dismantlable rotary arms on each level. Maximum height between levels 70 mm. Load capacity: max. 15 type DIN inserts. Made in stainless steel AISI 304.

DIS-WD7

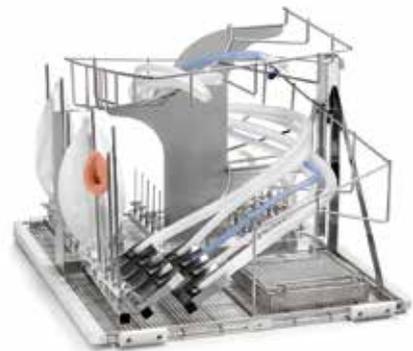

RELEASE TROLLEY FOR LARGE DIMENSION MACHINES

Loading trolley with locking system to load washing material into the washer disinfector. Anti drop system to collect any residual water from load material. Wheels able to be locked. Anti upside down system for security transport Ergonomic handle and design. Made in stainless steel AISI 304.

CSKAE7

ANESTHESIA LOAD CARRIER

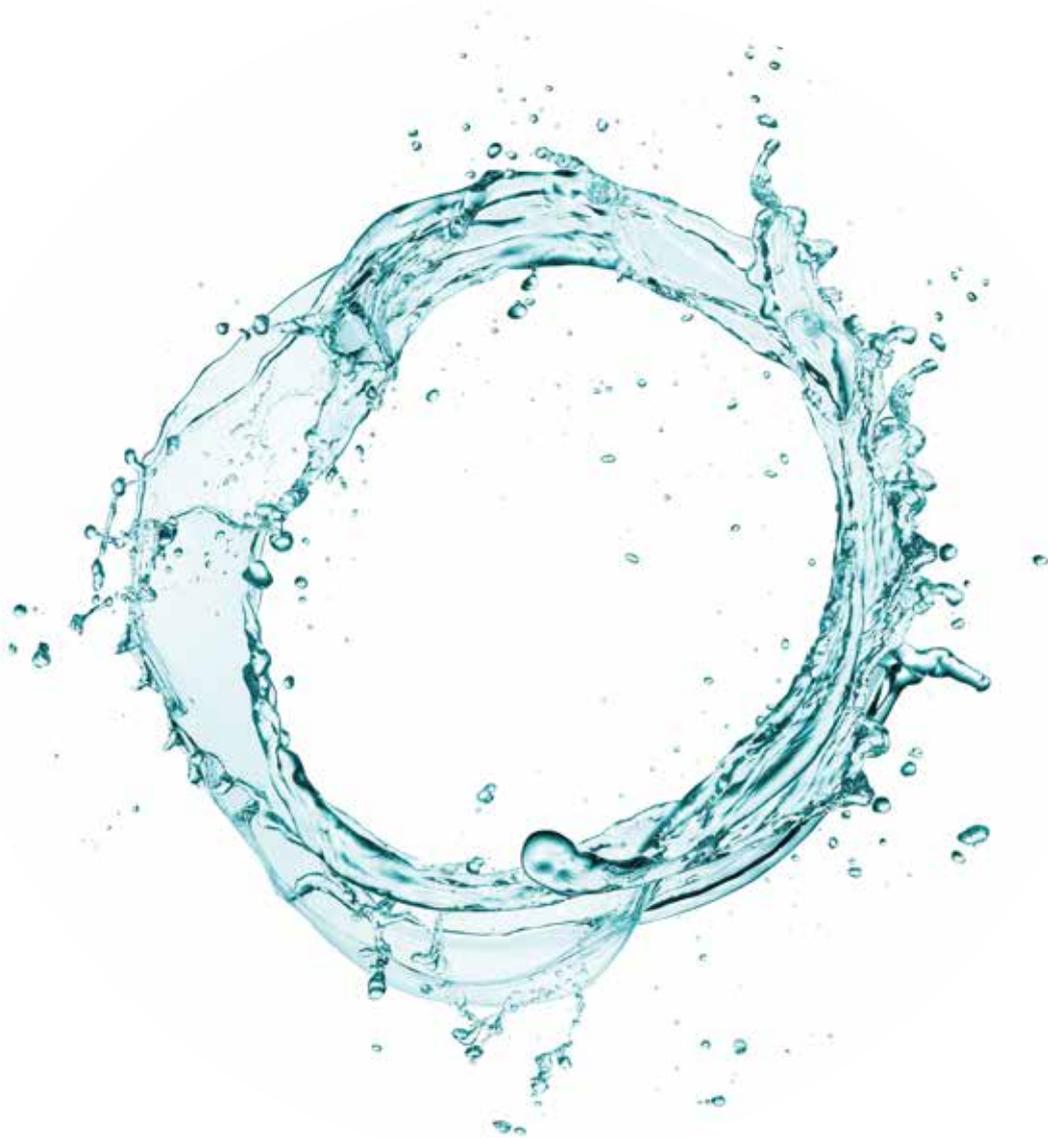

Load carrier for treating anesthesia instruments. It is equipped with an injection system for cleaning the inside of corrugated tubes with 10 nozzles for catheters, n° 4 for balloons, n° 4 supports for masks and accessories. Made in stainless steel AISI 304.

WATER TREATMENT

To achieve high quality wash standards, it is recommended to use properly treated water. To ensure maximum performance in the pre-washing, washing and neutralizing stages, always use softened water. All under counter models have an efficient integrated water softener that can re-

duce the hardness of the water supply, eliminating the formation of whitish spots inside the chamber and on the treated instruments. For a correct use of the instrument washer WD7000 an external water treatment system is necessary, given the large amount used in the washing stages.

WP3000

RESIN COLUMN WATER PURIFIER

The WP3000 water purifier is used to produce deionised water at 0.8-1 $\mu\text{S}/\text{cm}$, suitable for the final rinsing of instrument washers. The system uses mixed bed resins (disposable) which can also retain silica. When the resins run out, they can simply be replaced with the MI700WP kit.

The resin cartridge is made out of stainless steel, as is the entire machine. Net capacity of cartridge: 15 litres. Dimensions: l x d x h = 300x600x850 mm.

MI700WP

Anion/cation mixed bed resins kit for the WP3000 water purifier. Total exchange capacity 42700 litres/ $^{\circ}\text{F}$ * end of cycle at 5 $\mu\text{S}/\text{cm}$ (*Hardness in French degrees). Supplied with used resin disposal bag.

WS14E

WATER TREATMENT SYSTEMS

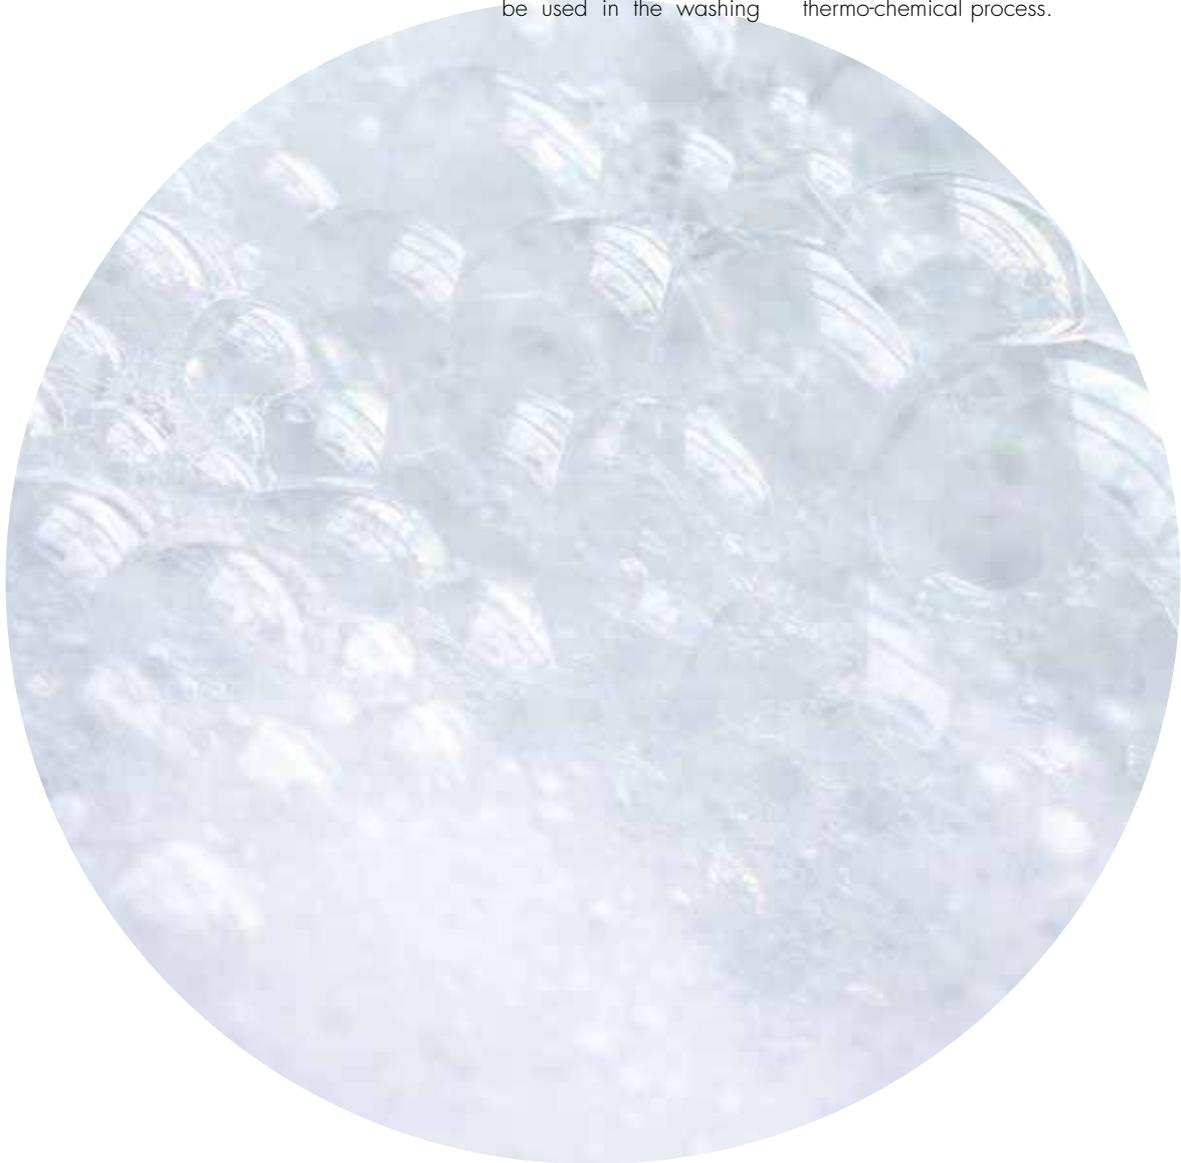

The WS series of appliances are technological water softeners capable of completely eliminating lime scale from water. The resins are regenerated using normal sodium chloride. Available in versions with flow rates of up to 2200 litres/hour, the models are fitted with an electronically controlled head which can be programmed depending on the hardness of the water. They provide backflow regeneration based on the volume of water (bearing in mind the resin saturation rate) and proportional brine in order to optimise water and salt consumption.

	WS11EB	WS14EB	WS17EB
MAXIMUM FLOW RATE	1800 l/h (43 l/min)	2000 l/h (43 l/min)	2200 l/h (43 l/min)
NOMINAL FLOW RATE	1500 l/h (43 l/min)	1600 l/h (43 l/min)	1800 l/h (43 l/min)
RESIN CAPACITY IN LITRES	11	14	17

CAPACITY LITRES (SALT)	about 20	about 30	about 40
CONNECTIONS	1"	1"	1"

DETERGENTS

The use of specific detergents is essential to obtain accurate instrument washing. Smeg has a full range which are specially designed for instrumentation. Alkaline and enzymatic detergents should be used in the washing

phase as well as neutralizing acids in the neutralization phase. Smeg also recommends a disinfectant dedicated to the treatment of thermoplastic instrumentation and anesthesia tools to help the thermo-chemical process.

SYMBOLS

In the sterilisation and sub-sterilisation rooms, washing and thermo-disinfection are today considered a fundamental step in the sterilization process. The use of professional washer

is essential, especially in the treatment of OP-shoes, the lactarium, for washing and sanitizing bottles and teats, and infectious disease centers. The Smeg washer disin-

factors are versatile and flexible to suit all customer washing needs.

BABY BOTTLES WASHER DISINFECTOR

The new Washer Disinfector models include specific programs for the treatment of baby bottles and teats used in neonatology departments to ensure complete elimination of possible sources of infection.

WASHER DISINFECTOR FOR INSTRUMENTS

The cleaning and thermal disinfection of operating room instrumentation is the necessary prerequisite for complete sterilization. From irons for orthopedics and general surgery up to the most delicate sets for minimally invasive surgery, laparoscopy and ophthalmology.

WASHING DISINFECTOR FOR OP SHOES

Thanks to special supports, Smeg's new generation washer-disinfectors are a professional solution for the accurate and systematic treatment of heat-resistant op-shoes of medical and paramedical personnel.

Maximum number of CSKDIN basket inside the chamber

Maximum number of CSKDIN basket inside the chamber

WASHER DISINFECTORS FOR DISHWASHERS

Through the control and proper disinfection of dishes used to serve meals, any cross-infection can be eliminated, especially in environments such as addiction treatment service, infectious disease and private-to-beep wards. For this reason, a handheld instrument becomes the correct washing solution.

BUILT-IN

Washer disinfector which can be installed built-in for the best use of the space

FREE-STANDING

Washer disinfectors can be installed free-standing. We suggest to buy also, in this case, the base for a much more ergonomic job.
